

Luzerner Kantonsspital

ENDOVASCULAR THERAPY OF PERIPHERAL ARTERIAL DISEASE

Wednesday, January 8, 2025 Thursday, January 9, 2025 Lucerne Cantonal Hospital

Dear colleagues,

In addition to conservative and surgical options, endovascular therapy is becoming increasingly important in the treatment of peripheral arterial disease. The development of modern devices and the associated improvement in long-term patency rates as well as the expansion of procedural techniques are sustainably supporting this trend.

This workshop is aimed at colleagues who are at the beginning of their interventional training. Accompanied by a theoretical part, the focus is on working together on simulators and in the catheter laboratory. In small groups we will discuss various strategies in endovascular therapy of the iliac and femoro-popliteal arteries and put them into practice.

We look forward to your participation.

Prof. Dr. med. Aljoscha Rastan

The workshop tutors

Prof. Dr. med. **Aljoscha Rastan**Chefarzt Angiologie

Dr. med. **Thorsten Grumann**Leitender Arzt

Dr. med. **Dorothee Hellenschmidt**Leitende Ärztin

Dr. med. **Vasile Bocsa**Oberarzt

Meisam Khorrami Oberarzt

Program 1st Day Wednesday, January 8, 2025

18:45	Get together and dinner	
17:45	End of 1st day	
16:00	Get to know the devices - simulator training.	
15:30	Coffee break	
15:00	Closure devices, access-site complications	
14:30	Procedures on the femoro-popliteal arteries	
14:00	Procedures on the iliac arteries	
13:30	Implementation of endovascular therapy: Guidewires, catheters, balloons, stents, atherectomy-, and thrombectomy devices	
12:40	Lunch break	
11:50	Get to know the devices - simulator training	
10:30	Start of Endovascular Therapy: Preparation and first steps: Arterial access, guidewires, sheaths, catheters	
10:15	Welcome and introductory words.	
09:45	Registration	

Program 2nd Day

16:15

End of 2nd day

Thursday, January 9, 2025

09:00	Group 1: Simulator training: Procedures on Iliac- and femoro- popliteal arteries, closure devices, case demonstrations	Group 2: Interventions in the cath lab: Treatment of the iliac- and femoro- popliteal arteries
10:15 - 10:45	Coffee break (optional)	
	Group 1: Simulator training: Procedures on Iliac- and femoro- popliteal arteries, closure devices, case demonstrations	Group 2: Interventions in the cath lab: Treatment of the iliac- and femoro- popliteal arteries
12:00	Lunch break	
13:00	Group 1: Interventions in the cath lab: Treatment of the iliac- and femoro- popliteal arteries	Group 2: Simulator training: Procedures on Iliac- and femoro- popliteal arteries, closure devices, case demonstrations
14:15 - 14:45	Coffee break (optional)	
	Group 1:	Group 2:
	Interventions in the cath lab: Treatment of the iliac- and femoro- popliteal arteries	Simulator training: Procedures on Iliac- and femoro- popliteal arteries, closure devices, case demonstrations

General Information

Organization

Lucerne Cantonal Hospital
 Department of Angiology
 Spitalstrasse, 6000 Lucerne 16, Switzerland

For all matters relating to the workshop mail to rahel.buehler@luks.ch.

Workshop Leader

Prof. Dr. med. Aljoscha Rastan,
 Department of Angiology
 Lucerne Cantonal Hospital

Workshop Location

Lucerne Cantonal Hospital
 Spitalstrasse, Haus 10
 6000 Lucerne 16, Switzerland

Credits

 A total of 12 educational credits will be awarded for participation in the workshop.

Fees and Charges

- The participant's fee of CHF 1'000 covers the following expenses:
 - Course organization
 - Rent for the venue
 - Rent of hands-on models and medical devices
 - Catering including lunch and coffee breaks
 - Accommodation and travel expenses are not covered

Registration

- Online via luks.ch/angio-workshop
- The number of workshop participants is limited.

Payment

 After registering, you will receive a confirmation email. We ask you to pay the invoice within 10 days by bank transfer to

> CH44 0077 8158 8310 1200 8 LUKS Spitalbetriebe AG Spitalstrasse 6000 Luzern 16 additional Information 259040

 Cancellation of workshop participation is possible until November 30, 2024. In the event of a later cancellation, the workshop fees cannot be refunded.
